THOSE receiving this Specimen Sheet are requested to forward at once, to the compiler, care of the publisher, as full an account as they are able to give of their ancestry, made out in the same form as that of the family of Jonathan Church, which is given as a specimen on page 6. If sufficient encouragement is obtained it is proposed to issue a full Genealogy of the Church family in an octavo volume, at the price of *five dollars a volume*. As it is impossible to go on with the work until subscriptions are obtained to the minimum number of 200 or 250 volumes, the members of the Church family who are interested in the issue of the work will please inform Wm. C. CHURCH, Editor Army and Navy Journal, who has consented to act as publisher and treasurer, of the number of copies they are disposed to subscribe for.

The Church family is one whose record ought certainly to be preserved; and every generation that succeeds makes it less and less possible to obtain a complete record. It includes, among the descendants of the present generation, FRED. E. CHURCH, whose name heads the list of American Artists, Judge SANDFORD E. CHURCH, Chief Justice of the State of New York, and others of whose character and reputation any family might well be proud.

FREDERICK JANES, *Compiler,*

Thoughtful and virtuous families, descendants of the good old Pilgrim stock, lovers of liberty and advocates of true freedom, will cherish a commendable pride in treasuring up the memories and in recording the noble acts of their ancestors, for the emulation and inspiration of their posterity.

These few pages are mere fragmentary sketches to foreshadow an issue of a book of permanent form and value, and to inspire in the Church family a sufficient zeal to search out hidden items in their family history, and supply missing links in the genealogical chain, so that the Compiler may issue a volume of correct history.

Having spent a number of years in a similar work, and gathered considerable material for this, he is prepared to carry out the plan designed and gather together the scattered branches from a variety of sources throughout the land, and thus construct a tree genealogical of true symmetry and of valuable reference.
